Art Unit: 2838

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-20 and 40-47 are drawn to power conversion apparatus, classified in class 363, and subclass 89.

II. Claims 25-39 are drawn to Uninterrupted Power Supply, classified in class 307, and subclass 66.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination of Group I, as claimed does not require the particulars of the subcombination as claimed because combination does not require 'DC voltage from either or both of a first power source and a second power source,' which is required for group II and Group of power conversion apparatus of power supply of Group I can be used for power conversion where only one power source is available for load circuit (from AC source to DC source).
